VOLUME 35

FRIDAY JULY 30th, 1937

NUMBER 18.

## Bank Of Montreal Crop Report

Issued by the Bank of Montreal, at its Head Office

General.—In the Prairie Provinces during the past week rains varying from light showers to torrential downpours have been received over most of Alberta and in many points in Saskatchewan and Manitoba. As a consequence crop prospects have improved in some sections of Alberta and the moisture should relieve the feed situation in parts of Saskatchewan. In Manitoba wheat is headed and is filling rapidly. In Quebec good yields of the staple crops are in prospect, climatic conditions continuing to be favorable to growth and moisture plentiful. In Ontario crops in general have made satisfactory progress to date, and harvesting of a good average crop of fall wheat is now general. In the Maritime Provinces fine and moderately warm weather has continued during the past week and conditions generally are favorable to growing crops. In British Columbia crops generally are doing well, there having been a continuance of favorable weather, with moisture satisfactory for the present. Details follow:

### PRAIRIE PROVINCES

ALBERTA.—Heavy rains in northern and west-central portions except the Peace River district have greatly improved the condition of wheat and coarse grains. The precipitation was received too late to benefit the east-central and south-east sections, except the Lethbridge area, where additional rains are required to assure the crop. Irrigated crops are in favorable condition. The feed situation is considerably improved.

SASKATCHEWAN.—While the rainfall should improve the feed situation in the southern central and west-central districts, the wheat crop in this area is beyond recovery. In the northeast, where some good stands still remain, and also in the east-central area, precipitation was light or entirely lacking and good rains are required immediately.

MANITOBA.—Crops over most of the Province are progressing satisfactorily. Rain has fallen in some districts, but in the north-western section further serious deterioration has occurred from drought. Rust infection is fairly widespread, but damage is not serious at present. Some hail damage has occurred in a part of the north-eastern district.

### MONTREAL — VANCOUVER DAYLIGHT FLIGHT SET FOR FRIDAY, JULY 30

Ottawa, July 27.—Weather permitting Transport Minister C. D. Howe accompanied by officials of his department and of the Trans-Canada Airways will attempt the Montreal-Vancouver daylight flight Friday. Mr. Howe had hoped some time ago that the flight might be made today, but changed his plans and advised the Vancouver authorities some days ago.

The flight will be made in the government's 10-passenger transport plane which has been used to inspect the air route.

Mr. Howe will be accompanied by Commander C. P. Edwards, chief of the air services; Philip Johnson, operating manager for the Trans-Canada Airways and three pilots.

## Passing Parade

Geo. H. Brewerton

Ladies of the community can soon prepare for a thrill. They will be able to see a group picture of the handsome men of the town.

Raymond is cosmopolitan. The worlds races and nationalities are well represented here as are religions. As a result we have a tolerant community.

Hereafter when we are misunderstood we are going to blame it on the month of our birth. We were born in March. Mrs. Shook in last weeks Liberty says March persons are hard to understand.

### BRAIN TWISTER NO. 29.

There is a fire in Raymond. Siren rings and firemen respond. Driver finds engine lacks 1937 license plates. Question—Should he break law by driving engine, or let fire rage.

"The There Maybe Herald is the does possibility Plan not Mr. is favor Low clear Social was to Credit. misquoted. Solon' Code to above There are three sentences. The first sentence comprizes the following words; 1—1—7—10—13—16. The second word starts second sentence. Then after every third word. The third word starts the third sentence.

Gertrude Stein and Solon Low have some writings. We have not the code to some of their output.

We are dumb. There are a lot of things we do not understand. Amongst them are—What a Chinaman says when he is talking to his cousin—What a woman says when she sings on the radio—What makes merchandise purchased in Lethbridge better than similar goods bought in Raymond—How double-entendre jokes originate—Why we cannot remember them—Why the wind always blows when one wishes to impress visitors to the country—Why the bank clock has been slow—Was it that way to allow late borrowers entrance—How a zipper works—If it was true there was great consternation in Aquaville last week when the denizens of the deep read in the Recorder that Ray Woolf was headed their way—Just how big was the Baalim catch—Did the fish measure as large when taken from the water as it did when the story was told a few times—What seeded players means, when speaking of tennisers—Why we do not stop.

### NEWS NOTES

Be on hand for the concrete pouring Friday. We'll be looking for you.

L. J. Pack & A. H. Zabriskie spent the week-end on a short fishing trip to the mountains.

About the only thing that grows without cultivating are weeds, bad habits and bills. Once any of these are neglected it's just too bad for the victim.

The first spring wheat marketed in Southern Alberta this year was sold in Grassy Lake on Thursday of last week, and yielded 15 bushels per acre, grading No 3. It was from the farm of Peter Neufeldt. On the same day some new wheat was marketed in the Pool elevator at Taber.

## Rotary Meeting Last Friday

Regular Rotary meeting and luncheon was held last Friday night in the 2nd Ward Chapel. Because of vacations a number of members were away, and others were in Edmonton marking examination papers so that attendance was rather small. However four Rotarians from the Lethbridge Club, and Mayor Tanner of Magrath, the guest speaker of the evening made a fair crowd.

The committees for the coming year were presented and sustained by a vote of the Club. Chairman L. L. Pack reported on the progress of the Swimming Pool so far as the work had proceeded.

Mayor Tanner spoke of the efforts that had been put forth to induce the Logan Garment Co. to locate in Southern Alberta, and stated that he, with others was now endeavoring to get a Woollen Mill located in Magrath. He felt that one of our greatest needs was the location of industries in the smaller towns, and felt sure if we would all work together and go after the heads of these organizations that many of them could be induced to locate and help build up the districts of the South.

A vote of thanks was moved to the speaker, and the National Anthem brought the meeting to a close.

## Wanted--Every interested citizen at the Swimming Pool Friday forenoon to assist in pouring cement. Be there at 8 a.m. and do your part in this project.

### WHICH ARE YOU?

There are two kinds of people on earth to-day; Just two kinds of people, no more, I say.

Not the sinner and saint, for its well understood, The good are half bad, and the bad are half good.

Not the rich and the poor, for to rate a man's wealth, You must first know the state and conscience and health.

Not the humble and proud, for in life's little span, Who puts on vain airs, is not counted a man.

Not the happy and sad, for the swift flying years Bring each man his laughter and each man his tears.

No; the two kinds of people on earth I mean, Are the people who lift and the people who lean.

Wherever you go, you will find the earth's masses Are always divided in just these two classes.

And, oddly enough, you will find too, I ween There's always one lifter to twenty who lean.

In which class are you? Are you easing the load Of overtaxed lifters, who toil

### NEWS NOTES

One-half of the school holidays are over and the kids are thinking about the nearness of school and studies again.

Rapid progress is being made on the new elevator of Ellison's Voss brothers of Calgary have the contract for this job.

Frank Judd of Tacoma, Wash was here last week visiting with his brother Jack. A family reunion was held at Waterton Park on Wednesday of last week.

A good attendance was present for the organization meeting of the music classes Monday afternoon in the Second Ward Chapel.

Stan Hutchinson, who is working in the smelters at Trail B. C. spent the first part of the week with his parents and brothers and sisters here returning to his work today.

Binders are running now in many barley and winter wheat fields, and threshers will commence next week. Jensen Bros. and Christensen Bros. have been overhauling their separators this week.

down the road?

Or are you a leaner, who lets others share Your portion of labor and worry and care?

By Ella Wheeler Wilcox.

## Raymond Loses to Lethbridge

Losing by 3--8 in the afternoon and 7--8 in eleven innings in the twilight game, the Rangers came home with a smile on their faces, the Miners admitting that Raymond gave them the only real opposition they had met in two years. The local nine immediately put in a challenge for another chance at the White Lunch cup and this brace of games will be played a week Sunday.

J. V. Heggie, Manager of the Rangers said the boys played wonderful ball. Alex Yanosik pitched the first game and Russ Nielson and Ab. Cahoon divided the burden in the next game with Walker catching. The scores Wednesday should create plenty of interest for the next games and the boys are sure to be on their toes in an effort to bring the mug to Raymond.

## Large Number Taking Music Course

### RADIUM DRIVE

The Raymond Women's Institute wishes to thank the people of Raymond who so willingly contributed to the Radium Fund. The following are the results of the drive:

Business Men and Merchants	\$12.30
Employees of the Canadian Sugar Factories	9.75
Raymond Second Ward Relief Society	5.00
Raymond W.I.	16.00

Total Amount \$43.05  
The advertising for this Radium Drive was donated by the Raymond Recorder.

### MRS. DON WALL HONORED

On Sunday, July 25th, a family reunion was held at the Fred Piepgrass home in honor of Mrs. Don H. Wall who is leaving very shortly to join her husband in the States. The afternoon was spent in conversation, refreshments and relating family happenings of by-gone days.

There were present; Mr. and Mrs. Fred Piepgrass and family, Mr. and Mrs. Wilford Harris and family of Taber, Mr. and Mrs. Byron Wall and family, Mrs. Lizzie Wall and family, Mrs. Don Wall and family, Mr. Mrs. Wm. Boyson and family of Stirling, Mr. and Mrs. Jack Peterson and family of Stirling, Mr. and Mrs. Henry Piepgrass of Lethbridge, Mrs. M. W. Boyson and Mildred, making fifty in all that attended.

### NEWS NOTES

Chas. R. Wing took a carload of people to the Temple Wednesday. The Temple will close for the summer holidays after the sessions on Friday.

After about Tuesday, if you can't find your kids they may be at the Swimming Pool. However, it may be later than that before any water can be turned on. The wading pool must be constructed yet.

### VIA CANADA TO THE WORLD

As the Crow Flies  
Men have gone the longest way round on earth for so long that now that they fly above the earth their old habits dominate them. At least the Russians flying over the pole to Vancouver have reminded many that crows would not make the long journey that airmen have been making to get to their desired destinations. Of course the Lindbergs in flying "North to the Orient" brought the attention of many people to the fact that Shanghai is about 4,000 miles nearer to San Francisco via Canada than by the present route.

Probably the thought of cold weather and ice on wings has frightened off some fliers. These have been very successfully braved for many years by Canadian flyers who fly over much uninhabited land to Canada's remote places. Ice on wings, we are told, may be melted by pipelines from the engine exhaust to wing edges. Who knows, possibly Canada will develop great international airports adjacent to some of her magnificent beauty spots and thus encourage world travel via the north. It is not impossible. Take another look at your globe.

Nearly 250 people were at the organization meeting Monday afternoon and registered for the Music Course in Chorister and Organist work being conducted by N. L. Mitchell of the L.D.S. Church Music Committee. Classes are being held morning, afternoon and evening, and Mr. Mitchell is a very busy man.

It is a distinct tribute to the interest of Taylor and Lethbridge Stake musicians that in spite of the very busy season this large number should leave their work and arrange to take the week's course. It also shows a fine spirit of co-operation when the two Stakes can get together and instead of two three day courses, spread the course over an entire week and thus get more detailed and specific instruction in musical work.

The results of the school should soon be reflected in an improvement in our community singing and choir work, which will be greatly appreciated by all congregations of Saints, who are great lovers of music.

### WEEKLY EDITOR PASSES

H. G. McRea, editor and publisher of the Hanna Herald died at Hanna Tuesday, July 27th, after a long illness during which he has maintained a wonderful spirit of optimism. He leaves his wife, one daughter Hazel, and two sons, Jack and Bob to mourn his loss.

He was an outstanding figure in the Provincial Newspapermen's Association of weekly editors and his services as Secretary of the Association will be very keenly felt.

The sympathy of the press goes out to the family in their bereavement. Funeral services will be held in Hanna this afternoon.

### NEWS NOTES

See you at the Swimming Pool Friday.

Paul Schneider took out a new John Deere binder from the local agent on Tuesday.

Mr. and Mrs. A. D. Woolley returned last week from trip to the United States on a vacation.

Mrs. Genevieve Hawkins won \$15 on the Mutual Benefit draw last week.

Miss Barbara Collett of Taber is a Raymond visitor, the guest of Mr. and Mrs. J. F. Judd Mrs. Judd is a sister.

### COUTTS WON 7-6

In an exhibition game played here last Friday night the Coutts nine defeated the Raymond Rangers by a score of 7-6. The locals were somewhat out of practice, and the regular lineup was not on the job, which somewhat weakened the lineup. However, the Coutts boys played real ball all the way and were deserving of their win. They were a fine bunch of fellows and the local nine enjoyed playing with them.

A return game will be played in the border town when arrangements can be made and the rush of harvest gives the locals a little more leisure time.

Owing to other appointments we did not get a running story of the game and so details are lacking for this report.

### GOOD SPIRIT OF CO-OPERATION ON POOL

Generally speaking there has been a splendid response to the request of the committee in charge of the Swimming Pool construction for volunteer labor. Some few have made excuses, some justifiable, some didn't sound so good, as to why they couldn't come; and in a very few cases the ones asking them to work have been told to go to a warmer climate. These cases we are glad to state are few. Nearly everyone approached has responded willingly and the committee is grateful for the support received.

The forms are all in, tied with the wire, the reinforcing steel is in place, the cinders tamped, and made solid. On Friday the cement is to be poured and this will be the day that the army of labor is required. It will require seventeen good men for each shift, and some of us only able to do half a man's work on a shovel or an Irish buggy will need to be there in twice the number in order to get the work done. The first shift starts at 12 midnight Thursday, and the work will go steadily on until the last of the concrete is poured. Those in charge have the work well organized if the citizens turn out in sufficient numbers to keep the work going.

Under the direction of I. B. Roberts, the auxiliary organizations will serve refreshments to the laborers during the shifts so that the work can be carried on without anyone being unduly overtaxed. Monday night the Sugar Factory crew, or at least many of them bent the steel for the reinforcing, and Tuesday night the steel was all wired into place, and everything ready for the pouring of the cement. The Sugar Factory officials and men have helped wonderfully in both the technical and manual ends of the project.

Be on hand now Friday and let's get the cement poured and drying. The kids of the Town are counting by hours now until they will be able to get into the Pool and enjoy a swim in clean and sanitary water and surroundings. You can do your bit at any time of the day.

### THE VAGABOND FARMER

North Shore of Lake Superior. —Here we are four automobile voyageurs, perched on the edge of this greatest of all lakes, by name Superior. Last night we drove till dark then pulled into this cove. Deep down in a rocky gorge the dark waters of some nameless river poured with violence from the foot of a thirty-foot cascade into this great blue inland sea. We climbed down the rocks to the waters edge, cooked supper and made camp for the night. We went to sleep in the deep woods with a feeling of deep exultation, with the sound of tumbling waters in our ears. At four in the morning we awoke almost in terror with the sound of a multitude of mosquitoes in our ears. It was a fine contrast of beauty and the beast. We cooked breakfast: a gallon of porridge, eight eggs, and coffee, with the angry beasts about us. Then one of those violent storms that gives Thunder Bay its name, descended upon us without warning to soak our beds and breakfast reminding us of Newbold's lines:

Sure if misery man could vex  
There it beats on our bended  
Necks."

#### The Trip So Far

From Toronto we went to Kingston then to Ottawa, following the Ottawa River up to Pottawawa to strike west from there to North Bay. This is the historic route followed by Canadian voyageurs as they paddled their great freight canoes laden with pemmican, from Montreal to the heart of the continent. When we reach Fort William we will rejoin the route and follow it to Winnipeg. At North Bay we visited the quintuplets. At Sudbury we spent some time visiting the mines and smelters. We saw logs turned into newsprint at Sault Ste. Marie, and crossed over to the United States which was necessary as the trans-Canada Highway at Fort William and Port Arthur. Then its westward ho, and it's to the mighty west we're bound.

Callander three years ago slept on the east shore of Lake Nipissing. A sawmill, a station, a filling station, a church or two and a quiet, efficient little country doctor. Then the quintuplets came and this little grey-headed doctor saved their lives. Today Callander, home of the world's most famous babies, is the world's most famous village. It has several filling stations with special rates for five gallons of gasoline, a thriving hotel, and a number of tourist homes. Visitors have their pictures taken in front of the white picket fence of the babies' doctor. A few miles east of Callander there lived a French community,

on poor sour land with gaunt, miserable buildings. Today a broad highway runs to the door step of the Dionne home around which has grown a very healthy mushroom. This mushroom includes the Dafoe hospital, with a special gallery where visitors may see the babies but not be seen. A five-acre field provides parking space: a boy sells lucky pebbles from the Dionne farm, another lad collects twenty-five cents from those who want their picture taken in his ox cart; Daddy Dionne has a store, forty by fifty in size, and busy as a land office. Daddy himself, once a French-Canadian farmer two jumps ahead of the Wolf, sits in a euthanized room and collects twenty-five cents for his autograph. We fooled him by using carbon paper in our album, getting four signatures for the price of one. Daddy is as well groomed and tailored as a Montreal financier and appears to have no worries. His farm grows mustard and weak hay. He now cultivates a more productive soil—human gullibility! Barntum said: "One is born every minute", and he was right and they seem to all be at Callander.

What about the babies, you say? Well, I am but a mere man. They were just five healthy, beautiful, energetic little girls, all identical, all charming, all very wealthy. Do you know a fairy story more preposterous, more grotesque, more absorbing, than the story of these five little French-Canadian ladies who stole the heart of the world? I'm glad I went.

#### The North Land

The north of Ontario is so vast that in comparison the South shrinks to a cluster of villages. Railroads and highways cut across it here and there like the stroke of a knife on an immense batter. There is a mark here and there, a slight dent on a vast stretch of rock and forest. It is also a rich land. Bare little villages grow up here and there as men go about the business of cutting timber and extracting from the hills. The village may die, sinking back into the solitude of the north. It may grow into a great ugly growing town like Sudbury.

At Sudbury we visited the mines, and the smelting operations. We did not go underground but we saw the smelting operations. Nickel, the chief product, is used for bathrooms and battleships. Both of which are much in demand today. Wages are high, men are being hired every day, money is plentiful. Yet it looks like a slum compared to Annapolis Royal in Nova Scotia. In an area of about twenty acres five thousand people are crowded, often a whole family crowded into one room. Children play in the street, the library would be small for a village. But it is growing at the rate of three thousand a year, and houses are as scarce as trees in China. Some day it will mature, acquiring libraries and playgrounds; today it is a real mining town.

#### On To Winnipeg

At Winnipeg we will get our first mail since leaving home. We will get our shirts washed have a bath, sleep in a clean bed then strike west. On and on our auto goes, And where we'll land nobody knows.

#### THE WORD OF WHEAT

(By H. G. L. Strange)

"The desert shall rejoice, and blossom as the rose"—Isaiah 35-1. Comforting at this time are these words from the book of Isaiah, and they are reassuring too. Some are telling us that a large part of the West is now a desert and will never grow good crops again. These good people I believe, are mistaken, for the history of our Prairies, it seems, reveals clearly that the years of drought are, in the end, succeeded by years of good rainfall, and that on the average, over a long term, sufficient rain falls to produce profitable wheat crops, at least on 20 million of the 24 million acres now in wheat on the Prairies.

It is true, of course, that periods of drought arrive. To tide over

### Our Edmonton Letter

(By T. B. WINDROSS)

Edmonton, Alta.—Things are beginning to move in Governmental circles in the Capitol at present and with the Premier's definite announcement of a special session of the legislature to open August 3rd, there is likely to be much more doing than there has been for some time in Social Credit circles.

The Premier's statement that the session will deal with Social Credit legislation made necessary in order to carry out the plans formulated by the experts from London who are guiding the board in its activities has attracted much attention.

During the week the Board has sent a letter to the Social Credit members of the legislature suggesting among other things that they secure opinions from their constituents as to the best methods of publicity and the kind preferred by them. It also suggests that demonstrations be held everywhere endorsing the acts of the government as they occur so as to impress the public with the reality of its approval of what is being done.

It was learned today that the letter sent to the bankers in Alberta by the provincial government asking them to co-operate in establishing Social Credit has been referred to the Bankers' Association in eastern Canada and that if a reply is sent it will come from that association. It is pointed out that all banks in the Province are merely branches of the parent banks in the east and therefore cannot act on such an important matter alone.

Some confusion is expressed on the ground that the government's letter does not give any detailed explanation to indicate exactly what it means and the bankers are unanimous in saying that they cannot understand it.

Altogether the coming few days or weeks are likely to be epochal in the history of Alberta. The Premier has hinted that the next fifteen days will see important steps taken and Fred Anderson, M.L.A., of Calgary, has stated that the legislation to be passed at the special session will have " repercussions that will echo around the world."

Everything points to the government at last being determined to have a showdown as to whether Social Credit can or cannot be introduced to the province, and as to whether anything or institution will be allowed to stand in the way of the

these we must try to conserve our resources in the wet years.

There are, however, 4 million acres on our Southern Prairies where insufficient rain falls, on the average, to produce wheat profitably. This area, however, even in the driest years would grow grass that in turn could produce cattle and sheep profitably.

Presently then, and provided land is put to a proper use, we may be certain, as we are assured by the book of Isaiah, that once again "The desert will rejoice, and blossom as the rose."

Following factors have tended to raise price: Small Argentine and Danubian shipments—Rust, high temperatures and grasshoppers prevalent in U. S. north-west—Seeding is late in Argentina—European political situation still very unsettled—Pessimistic grain reports from Germany with large deficiency mentioned—Considerable rust infection in Manitoba.

Following factors have tended to lower price: Broomhall calculates Northern Hemisphere wheat crop ex-Russia and China will be 272 million bushels greater than last year—Good rains in Australia, Russia, Argentine and Western Canada—Russia offer barley for sale—World demand for export wheat very disappointing, chiefly on account of deficiency of foreign exchange—Italy's almond production large.

### A SIGNAL LINK OF EMPIRE

Photo courtesy Trans-Canada Air Lines

Winging its epic flight from Ireland to Newfoundland, the great flying boat, the "Caledonia", was in touch with ground stations continually by radio.

Before rising from Botwood on the last leg of his journey, and all the way up the St. Lawrence to Montreal, Captain Wilcockson was in touch with St. Hubert Airport, where the very latest type Northern Electric radio transmitter is in use.

Photo shows Mooring Mast housing the transmitter. The Empire Flying Boat "Caledonia", encircling the mast as she commenced her return flight across the Atlantic. The Transmitter — note the telephone dial, indicated by arrow, for automatically "dialing" any one of ten frequencies — a recently developed feature designed especially for Airport use.

## EXPERIMENTAL STATION

WEEKLY LETTER  
LISTING SUMMER-FALLOWS  
TO PREVENT SOIL  
DRIFTING

There is every indication that many summer-fallows conducted this summer will be in condition to drift quite readily unless some precautions are taken to protect the soil from wind action. Many are ploughless fallows but have had so little stubble or trash that the fallows are bare, so there is little protection against drifting. At your Experimental Station at Lethbridge some fallows have been handled about the same as others in the district and they will need additional protection even on narrow strips. This is a condition that has prevailed in what is called the "Dust Bowl" of the United States, that is, there has been no growth to provide mechanical protection, so in that locality they have depended on listing to hold the soil. Listing has also been used in Southern Alberta and has been quite effective on all types of soil excepting sand. Very deep listing has also been quite helpful even on sandy soils.

Loam soils can be quite satisfactorily listed with a stiff shank cultivator equipped with listing shovels. These shovels can be purchased from implement dealers at about \$2.75 each and three shovels are required for a 9 to 11 foot cultivator. All of the duck feet are removed from the cultivator and the three shovels put on, two on the outside shanks and one in the centre. The listing shovels should be set quite deeply as it requires a furrow 7 to 8 inches in depth to provide the proper protection. Listing of this kind with three shovels requires about the same power or slightly more than an 11 foot cultivator with duck feet blades at an ordinary depth.

If the field is stoney or too hard to list with this implement or if the cultivator is not available, a sulky plough can be used effectively. If serious trouble is expected, a deep furrow ploughed every four feet may give effective protection. Some farmers plough furrows about 8 feet apart and if this does not appear to give sufficient protection they plough another furrow between each of the other furrows, making them 4 ft. apart.

Deep cultivation with a duck foot cultivator usually furnishes considerable protection for loam soils, but is not so effective on loose top clays and may give little or no assistance on sandy soils.

Comparatively deep fall plowing may give very effective protection, but the ploughing must be 2 or 3 inches deeper than the land has been cultivated during

the summer. It is well worth while for any farmer who has a summer-fallow that may drift to carefully consider the possibility of protecting his land by some method of listing or by fall ploughing. Any black summer-fallow is quite sure to be in danger of drifting, and listing or ploughing may prevent a drift that may have serious consequences.

## ERRORS

(July Re-Vue Magazine)

A blind newsboy in Arizona went upstairs, took a bath, and was annoyed because he couldn't find the soap and towels. When a stranger came in, the boy discovered he was bathing eight blocks away from his own house.

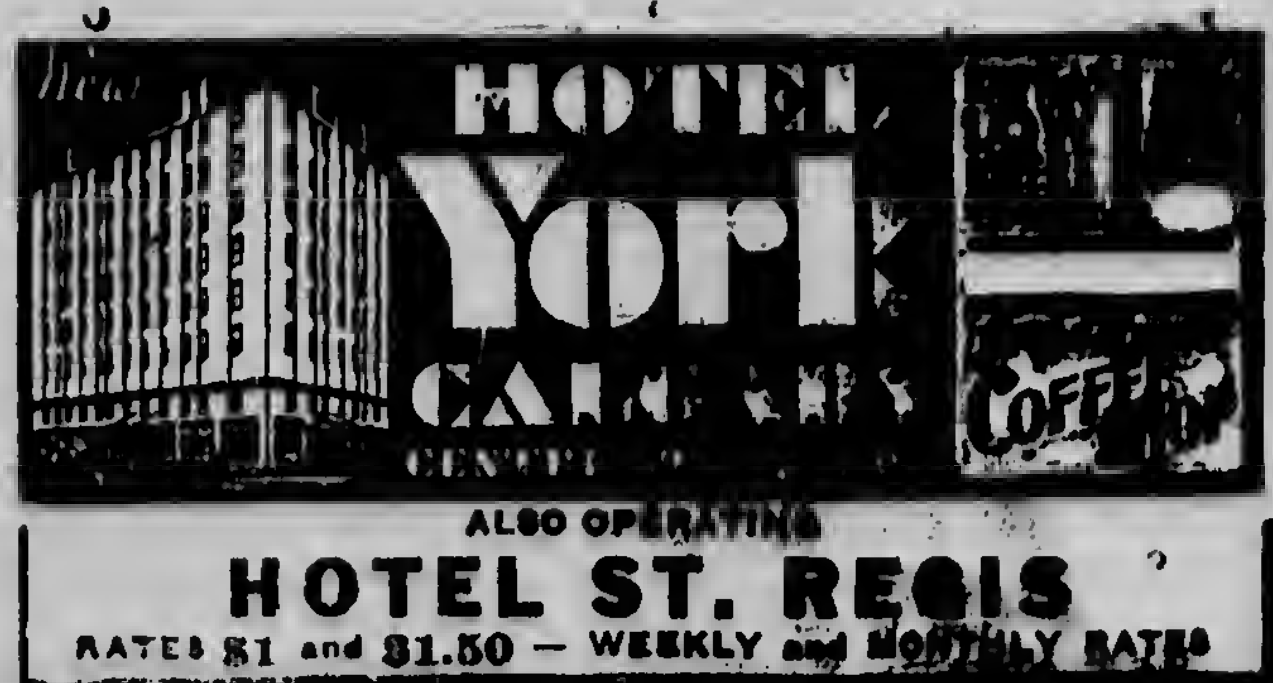

Burglars who held up a New York barber shop told the customers to go into the back room. Two of the customers were policemen, who went out the back door and met the thugs on the outside.

### NEWS NOTES

Boothe Card is laying cement walks around his home now.

Mr. and Mrs. A. Paterson returned late Thursday evening from their holiday trip.

Mayor Tanner of Magrath and his mother, visited Mr. and Mrs. B. B. Kenney and family Friday evening.

Miss Carrie Jensen, of the Raymond Mercantile office staff is holidaying at present spending her time in Crow's Nest Pass and B. C. points.

Beth Walker, Don Merrill, Ruth Kimball, et al, who attended Summer School in Salt Lake City returned home last week end.

The Olgary Power repair crew finished their work and pulled out of town Friday afternoon. They have been here about two weeks and have given the system a thorough overhauling, installing quite a number of new poles and removing some unnecessary wiring.

Mrs. Don Wall spent two days in Lethbridge last week visiting her daughter Jean and husband.

Melvin T. King is home, after spending the past month in Edmonton marking departmental examination papers.

Don Robertson, local manager of the Calgary Power Co. at Magrath was in Raymond on Tuesday.

Mr. and Mrs. Arthur Christensen and two sons, Mr. and Mrs. Wilford Rasmussen, Mr. and Mrs. Barney Jeffery, all of Redmond, Utah, were Raymond visitors with relatives and friends last week.

A bridal shower was held at the Henry Jensen home last Monday evening in honor of their daughter Merle, a recent bride. A large number of relatives and friends were present and a very nice evening enjoyed. Refreshments were served and the bride received a lovely lot of valuable gifts. The Recorder joins with the many friends of the young couple in wishing them much joy and happiness.

## NOTICE for TENDERS

### NEWS NOTES

Paul H. Redd returned Tuesday from Edmonton where he has been marking examination papers.

A. H. Zabriskie is vacationing now from the Canadian Sugar Factories, Limited. His holidays commenced Monday.

Mrs. Clarence Stevens and Mrs. Roxie Robbins went to Cardston Monday last for a visit.

Mr. and Mrs. R. J. Fansett and family returned home last week from their holiday trip, being away about three weeks.

Mrs. Cecil Finch returned home Saturday after visiting for the past seven weeks with relatives in Washington and Oregon.

Second cutting of alfalfa hay is going into stack this week, and in most cases the crop is better than average for a second cutting.

Jesse Wilde has purchased a new stream line International Truck from the Raymond Mercantile Co., Ltd., local agents for this line.

Misses Marguerite Romeril and Thora Garner sponsored a jolly party honoring Miss Donna Wall, Friday evening July 23rd. There were about 20 of the younger set present.

Typewriter ribbons, carbon paper, second sheets, typewriter bond, anything and everything in this line, at the best possible prices. The Recorder.

Mr. Wm. Gould, Calgary Power man for Raymond is on his holidays, having left Tuesday afternoon. His place is being taken by Mr. Alec Eaton of the Calgary Station force.

Mr. and Mrs. Wm. Matson and family, Fieldman of the Utah Idaho Sugar Company, spent the week-end in Raymond with friends, stopping at the home of Mr. and Mrs. F. R. Taylor.

Quite a few patches of winter wheat and barley have been harvested this week. Some very good grain fields are to be seen throughout the district, the recent storm working wonders on the condition of the crops.

Flames are running wild in the timber area near Fort McMurray and unless rains stop the fires thousands of acres of timber lands will be burned over according to reports.

Speakers at the Raymond 2nd Ward Sacrament meeting Sunday evening were Mesdames: Clarence Stevens, Roxie Robbins and J. Coates, and Elders: June Anderson, Wm. Jensen and Alma Hancock. Musical numbers were a piano solo by Miss Thelma Blake, Vocal Solo Miss Laura McLean, Male Quartette John F. Salmon and Co. and a special anthem by the Choir.

The three children of Frank Toth of Picture Butte were drowned in the stock watering dam on Monday of this week. The two younger ones went in wading and when they got beyond their depth and into deep water, their fourteen year old brother who was also unable to swim tried to aid them and he went under. The mother, also unable to swim had to be held back from the pond. A beet worker brought the bodies to the surface after they had been in about twenty minutes but artificial respiration failed to revive them. An inquest was not considered necessary.

### PASTEURIZED MILK

Some ten years ago, one of the largest cities of Canada had a devastating epidemic of typhoid fever. In the course of a few months there were 5,000 cases of the fever and more than 500 deaths. The scourge created local consternation; it was of great international interest. Officials of health departments from all parts of the continent visited the city intent to learn the cause of the disaster. Committees were appointed to study the cause of the outbreak; there was thorough investigation made of the whole subject. Most of the cases of typhoid were on the route of a certain dairy. It was discovered that the dairy's pasteurization plant was defective. The outbreak and its results were rightly attributed to the lack of care in the company's plant. The matter of pasteurization is not always understood by the public. It is simple. It means that the milk is heated (not boiled) to a temperature of about 145 degrees F. and maintained at this temperature for 30 minutes. The milk is then rapidly cooled to 40 or 50 degrees and kept at this temperature until used. Pasteurization properly carried out, kill the germs of a host of diseases which may be carried by milk, including typhoid fever, scarlet fever, diphtheria, undulant fever, tuberculosis and cholera. In addition septic sore throat and the summer complaint of babies are frequently prevented by the use of milk which has been boiled or pasteurized, because the effect of boiling and pasteurizing of milk is much the same.

In the smoking compartment of a fast train speeding westward from the city in question a group of men were engaged in argument. The dominant figure in the argument was a very voluble Irishman who like Irishmen at their best was an admirer of British institutions. In every case he had the best of debate.

Someone in the group had the temerity to suggest that the epidemic of typhoid, referred to, might not have occurred at all if the city's milk had been properly pasteurized. This aroused once more the fighting instincts of the Irishman. "Why," he exclaimed, "I wouldn't have pasteurized milk in my house. Look at me!" he cried. "I'm one of eleven and nine of us are living, and I'm not a bad specimen." He wasn't. He was a fine upstanding figure of a man. He went on.

"D'ye know what our mother fed us on," he enquired. "I'll tell ye. She put a little milk in a porringer on the stove and brought it to a boil. Then she broke a little bread in it. That's what she fed us." An elderly man in the group smoked his pipe. He had so far taken no part in the discussion. He remarked to the Irishman, "You should thank God for such a mother, for she fed you on milk that was the practical equivalent of the pasteurized article." For once the Irishman was beaten, but he was a good sport.

"Sure," he said. "I didn't know what I was talkin' about. I'll never have another word to say against pasteurized milk as long as I live."

Pasteurization or boiling of milk are guarantees against milk borne disease, but the pasteurization plant must not fail to deliver a proper product. If it so fails there may be disaster.

Chas. Nickel was in Lethbridge Tuesday.

Wednesday's rain was .02 inches. Top temperature was 90.

Fire destroyed the ice house and barns of the Lethbridge Ice Co. Monday afternoon, also burning four draft horses and a shetland pony which were locked in the barn by a load of hay stopped in the door. Loss is estimated at \$3,000 with no insurance.

Mr. Patey, of the Electrical Wholesalers, Calgary was in Raymond Thursday night and with Chas. Nickel was talking Norge refrigerators to some of Charley's prospects. Mr. Patey went from where to Magrath and Cardston.

Mr. and Mrs. Fritz Gehmlich of Picture Butte were Raymond visitors last Sunday.

Sunday and Monday were both hot sultry days. Rain would be welcomed by everyone.

Miss June May is spending a week's holiday with her aunt, Mrs. J. M. Workman in Cardston.

Mrs. Ella K. Milner, who has spent the past winter in Salt Lake City, Utah, is home again with her son Marshall.

Miss Bessie Biggers, of Warm-er was awarded a scholarship at the Art School in Banff from August 2nd to August 28th with- out the payment of any tuition. This award was given her for outstanding work during her school year.

Good progress is being made on the new home of Mr. and Mrs. Brownie Rolfsen, also on the new residence of Mr. and Mrs. Renam Pack. These two modern homes will make a good improvement to the fine homes of the Town.
